Signage, street furniture and equipment for your surroundings

Security, trust and professionalism

PROARTE is the most complete solution for your need to prepare any rural or urban setting with a well-cared for aesthetic, impeccable design and a quality that has made the company the benchmark in its sector.

We specialize in providing solutions; we define spaces and customize the surroundings, optimizing our products at all times to make your investment profitable.

Our company has more than 40 years' experience, a great professional track record supported by the recognition of official bodies and private entities.

Corners where PROARTE has left its mark

Commitment and quality

Innovative production capacity, a love of nature and the dedication of our team have made it possible for PROARTE to become today a leading company in its sector.

Our hard work, motivation and know-how have enabled us to reach locations all over Spain, Portugal and the Principality of Andorra; and we continue with our expansion process.

Clients and users of our products have been the fundamental pillar enabling and sustaining the company's growth. Our commitment to them is top priority in our commercial policy; we work to satisfy their needs and to make their brand experience as pleasant as possible.

Effort, constancy, desire to exceed and enthusiasm; our philosophy

Making the difficult easy

At PROARTE, we engage with the projects we participate in and learn from them. We strive to establish and maintain strong ties with our clients, suppliers and workforce. We have our own personnel and teams in place at the departments of administration, R&D+I, computing, graphic design, consultancy, manufacturing, installation and maintenance. A professional team of high-qualified specialists capable of responding and adapting to any market demand, a motivated and engaged team with the maximum priority of continued innovation and sustainability.

One of PROARTE's core principles has always been to offer a high-quality service close to our customers and with the maximum guarantee.

We invest in research and technology

PROARTE has a technical team for R&D+I that is constantly evolving.

Our knowledge of the market and the sector, our experience and track record enable us to have the capacity needed to take on any project, offering a global vision and solutions that adapt to each client.

We are currently developing and manufacturing new products in our range of signage, street furniture and accessible equipment, successfully overcoming all quality tests.

Our wager is for specialization and innovation through the practice of responsible sustainability.

Committed to the environment

Following with our work philosophy and good practices in the manufacture of all our products, we make use of the highest quality raw material to achieve an exclusive guarantee for our clients.

At PROARTE, we can guarantee that the timber we use is PEFC certified to show that the products are manufactured from wood from forests certified as being managed responsibly and sustainably.

The wood we use is treated with class IV water-soluble salts, TANALITH E 3499, guaranteeing it against any attacks by insects or wood-eating fungi for a minimum of 10 years. The treatment is applied in an autoclave using innovative and environmentally-friendly processes ensuring its natural beauty.

* As an additional option, clients can request the manufacture of their products in recycled plastic material.

Backed by inspection and quality programmes

All products with the PROARTE brand are subjected to rigorous quality assurance control covering all phases of their production, from the initial design to the installation of the finished products.

In order to ensure the fulfilment of this commitment, PROARTE holds the international certificates ISO 9001 for quality management and ISO 14001 for environmental management.

A process ensuring success

Idea

Evaluation

Design

Execution

Maintenance

Guarantee, commitment and satisfaction

We are aware that a product's quality is fundamental for user satisfaction. That is why we subject them to permanent inspections to ensure they meet the quality standards required. Our R&D+I department is constantly working to improve our processes, products and services.

Design

The engineers and architects study the project or idea, assess its feasibility and draw up the design of the product or structure.

Transport and installation

In situ

Maintenance

A maintenance team is in charge of overseeing the proper condition of the products and installations undertaken by the company, thus ensuring their quality and safety.

A project, an idea ... Our team makes it a reality

Selection of materials

Once the first phase has been completed, the next step is the selection of the best raw materials for the manufacture of the items ordered.

Manufacture

Based on the proposals contained in the design phase and using appropriate materials, the production teams roll up their sleeves to get everything ready within the deadlines agreed.

Manufacturing takes place at our facilities covering more than 7,000 m² in a factory equipped with the most modern and effective technologies.

A setting, a concept; our project

Signage

Rural and/or urban signage fulfils an essential function for the use and enjoyment of scenarios: guide and inform users.

The boom in inland tourism has highlighted the need to indicate and promote the cultural and environmental values of the surroundings as a way to make rural settings more dynamic.

Our team has technical experts in urban signage, qualified specialists in signposting hiking and mountain biking routes. We have extensive experience in the design, signage and equipment of prepared paths and routes covering any topic: nature walks, urban paths, cultural, ornithological, and riding routes, archaeology, ethnography, etc.

- » Technical advice. Execution of technical projects, study and design of the route (public and private paths).
- » Design and layout of graphic elements, adaptation and/or development of corporate images, preparation of texts and contents.
- » Mapping of projects, generating the final maps indicating how to arrive and what you will find, as well as inventory, analytical or summary maps.
- » Signage, equipment and installation of beacons.
- » Production of local guides and promotional materials.
- » Installation, maintenance and technical reports.

PROARTE is the national benchmark for the signposting of BTT routes, paths of tourist interest, short, long or local hiking routes.

Rural and urban furniture

Any setting can be equipped with high-quality, resistant constructions without disturbing their aesthetic.

PROARTE can provide you with an extensive range of products for equipping and furnishing sites. The work carried out in the design studio and in the factory mean that this range is in constant evolution to obtain ever better results in terms of both product quality and cost.

Tailor-made projects

Our company specializes in producing the design and plans for any structure: bridges, walkways, beachside structures, wooden houses, lookout towers, pergolas, birdwatching hides, etc.

Fitting out parks or gardens, fields, beaches or hillsides

Installations and maintenance

All projects require an investment of money and personnel. For this reason, it is necessary to ensure that the efforts made are not lost or impaired prematurely.

Our company has highly qualified personnel equipped with the latest generation machinery and technology needed to deal with any installation as efficiently as possible.

Our commitment to quality and satisfaction vis-à-vis our clients drives us to offer a maintenance service for all the work carried out.

A comprehensive solution for all your spaces

Design, printing and vinyling

The design is a fundamental part of any project; colours, fonts, media ... everything contributes to a better interpretation and understanding of the contents.

PROARTE offers the design, printing and vinyling of all kinds of graphic elements, providing digital printing, 3D signs, advertising hoardings, canvases, posters, etc.

And for the appropriate dissemination of your project, we offer design and layout services for promotional materials: leaflets, flyers, local guides, books and small publications, etc. As well as the design and programming of web sites and the implementation of the latest technologies to facilitate accessibility.

Forestry work and the conservation of the environment

Forestry work in natural spaces are fundamental for their correct conservation. At PROARTE, we are committed to respecting the environment and devote special efforts to its conservation as well as the recovery of the environmental values of natural settings.

Our team takes charge of the initial clearance, preparation and maintenance of roads, greenways, hiking routes, natural paths, routes, trails, etc.

Consultancy

We have appropriate technical equipment and personnel to perform the following studies:

- » Development and management of different projects using geographic information technologies, such as Municipal Management (LocalGIS, gvSIGMunicipal), geomarketing, geographic applications in web-mapping environments). Training courses in free GIS (gv SIG, Kosmo, QGIS, Sextant), citizens' participation 2.0. WebMap.
- » Study, analysis and management of participatory processes and action plans or strategic plans at different scales (local, district, provincial, regional): local agenda 21 initiatives, GDR, district councils, provincial councils, etc.
- » Identification and management of financial assistance and subsidies.
- » Judicial reports in different specialities: territorial and urban planning, geographic information technologies, the environment, socio-economic and territorial development or the knowledge society.

Transport

PROARTE offers an exclusive transport service for its clients.

We are aware of the importance of your order and the special conditions it requires. We adapt to your specific circumstances to fulfil the deadlines and timings agreed.

CATALOGUE

Discover what the PROARTE brand can do for you: an inhabitable setting that is both welcoming and pleasant, a scenario inviting you to relax and enjoy life in direct contact with nature.

You will be able to discover an extensive range of products in our catalogue. If you cannot find what you are looking for, you can contact our commercial department and explain your idea to them so that they can turn it into a reality.

We believe in what we do, we create unique, sustainable and environmentally-friendly settings.

We define spaces

At PROARTE, we follow the path to contribute to an improvement in the surroundings and to facilitate contact with nature on the most suitable conditions of safety and comfort for all users.

Day after day, we strive to adapt our products to the needs of our clients and users, adapting to an ever more demanding market in constant evolution. We have specialized in providing speedy and effective solution, without renouncing the quality that has made our company the benchmark in the sector, and always under the undisputable premise of sustainability. That is why we only work with PEFC certified timber from responsibly managed forests.

We have the most extensive range of products and services to equip any rural or urban setting and leave it in ideal shape for users.

Nowadays the PROARTE brand is a synonym for safety, trust and guarantee for our clients.
